

# BAXCOUNSEL

## QA QC Inspection

Since 1972

### Introduction:

The success of any project depends on sourcing high quality materials, products & services. Our experts can help you achieve your goals of superior quality standards, through detailed inspections designed to minimize negative impact of defective materials or project delays.

With 50 years of experience across many sectors - oil refineries, natural gas plants, steel plants, petrochemical complexes, cross-country gas pipelines, fertilizer plants, pharmaceutical plants, mining, power, defence, aerospace - we will provide you critical support to ensure that your procurement is a success, & plant and equipment are safe and efficient and technical resource needs are adequately met.

Our third party inspections in India, Asia, UAE & other GCC countries will provide you with the reassurance that your vendors and manufactured products meet your specifications and regulatory codes. We work alongside you, providing impartial & independent inspection services to provide you and your stakeholders with the assurance that your assets, from material through to installation are built to your specified criteria and will operate safely and

reliably.

As an independent & impartial third-party agency, Baxcounsel's qualified inspectors and surveyors will instill quality assurance principles into every key phase of your project. Our name is held in highest regard for the levels of service that we provide. You can be confident that Baxcounsel employees will work ardently to ensure the success of your project.

## About Baxcounsel:

Baxcounsel adds value for its customers by helping improve the quality, safety and reliability of critical assets and infrastructure thereby reducing risk. Baxcounsel provides a range of inspection, testing and engineering consultancy services from vendor capability assessments, QA/QC inspection, mill/plant surveillance, project expediting and providing specialist manpower services.

We have a network of offices across India, UAE & Asia and associates in Europe, North America, Asia & Australia; we are able to provide top quality services efficiently around the globe. We serve clients across a range of industrial sectors that include power, defense, aerospace, oil refineries, natural gas plants, petrochemical complexes, cross-country gas pipelines, steel plants, fertilizer plants, pharmaceutical plants. We have long-term relationships with clients built on our ability to enable their success.

We are ISO 9001:2008 certified and have breadth & depth of expertise accumulated over 50 years of providing services to our clients.

The first Baxcounsel office was established in Mumbai, India in 1972. Since then, the company has provided services to top companies in India & around the world and is now a leader in providing third party vendor inspection, project expediting & other project management services. Our board, management & employees are dedicated and passionate about our work and adopt our values of integrity and professionalism. Our client list includes top leading infrastructure companies in India and around the world such as Japan Gas Corporation, Petrofac, Reliance Industries, KNPC, Hindustan Petroleum, Kobe Steel/SISCO, Hyundai, Daelim, M. W. Kelloggs, Ras Gas, GAIL, Technip, Lloyds LR among other leading corporations. We are approved by highly selective regulatory bodies such as the Govt of India, Department of Explosives and Ministry of railways for inspection & certification of equipment for critical application. We have specific

understanding of critical equipment such as pressure vessels, heat exchangers, boilers, columns, reboilers, reactors; other engineering items such as pumps, valves, pipe & pipe fittings, compressors; & electrical/instrumentation items such as control panels & transformers.

## **Our Services:**

### **QA/QC Inspection**

Whether your project requires a complete, partial or only final inspection, we use a progressive & thorough approach to provide reliable & accurate services. To suit your needs, we take a very flexible approach in our structure and offer services ranging from half-day inspection visits to dedicated resident teams for several months or years. <sup>[L1]</sup><sub>[SEP]</sub>We use advanced technology, provide experienced and highly qualified technical experts from a substantial global database of talent and guarantee top-notch levels of coordination, support and follow-up:

- Stage-Wise Inspection
- Partial Inspection
- Final Inspection

### **ARAMCO Qualified Inspectors**

Baxcounsel have a highly qualified team of ARAMCO approved inspectors serving various disciplines such as valves & fittings, mechanical equipment, rotary equipment, skid mounted equipment, electrical equipment & instrumentation items. <sup>[L1]</sup><sub>[SEP]</sub>These inspectors have been specially tested by ARAMCO and have passed their stringent qualification requirements and are now approved to conduct quality surveillance, monitoring & inspection activities at various vendor workshops worldwide. <sup>[L1]</sup><sub>[SEP]</sub>These inspectors are available at various locations countrywide in India and Middle East, enabling us to provide efficient & cost effective solutions to our clients looking for support in achieving highest quality standards for projects related to the Saudi ARAMCO refineries.

### **Project Expediting Services**

Today, project schedules are tight and have almost no room for expensive delays. Baxcounsel's expediting services will give you reassurance that orders of essential equipment or products do not impact your deadlines. <sup>[L1]</sup><sub>[SEP]</sub>Project expediting can be performed simultaneously with inspection activities or independently as required by your specific project needs. <sup>[L1]</sup><sub>[SEP]</sub>Combined with our precise & transparent reporting that uses modern tools and presents information in your preferred format, our expediting services will help you fully understand the progress of your equipment

- Desk Expediting
- Field Expediting
- Project monitoring

### **Plant/Mill Surveillance**

Baxcounsel has an extensive network of experienced plant/mill surveillance inspection experts, well trained in the intricacies of this field. Those experts work to ensure plates, pipes, bends and their coating systems are manufactured

to the highest standards, are defect-free and fully compliant with international codes and standards. They are supported by dedicated technical coordinators with extensive industry experience who provide additional expertise and project-management support. Finally, superior progressive reports provide information to you either in our formats or in formats as preferred by you, so that you can fully understand progress of your project

- Welded
- Seamless
- Other processes

### **Specialist Manpower**

Important projects for industries such as oil refineries, natural gas plants, steel plants, petrochemical complexes, cross-country gas pipelines, fertilizer plants, pharmaceutical plants, mining require experienced & well trained resources to be available efficiently. Baxcounsel's qualified engineers and consultants have a peerless breadth & depth of expertise and experience. We provide neutral and progressive experts to support you at any stage in the asset lifecycle, to meet your goals of growth and improved performance and safety.

### **Vendor Capability Assessment & Other Specialist Services:**

With vast experience across many sectors, we will support you to ensure your plant and equipment are safe and efficient. We can support you with inspection and testing elements across a complete schedule or just one aspect. At each stage, our project coordinators and inspectors will keep you informed of progress on your project, making you aware of the actions your business must take. We will help you ensure the system or equipment you select is suitable for how you plan to use it. If you wish to add a new supplier to your list of approved suppliers or if you are having problems with existing suppliers, we can carry out detailed assessments to give you critical inputs in vendor capabilities. The primary concern with any new contract is the choice of vendor, especially if they are located remotely in workshops in several countries such as India, Sri Lanka, Dubai, Abu Dhabi, Singapore, China, etc. Audits and assessments help you find one that can deliver on time and isn't dependent on too many external factors.

## Our Sectors

Today, all businesses have to complete projects in tight deadlines, fixed budgets and to meet stringent safety, reliability & environmental regulations; and your assets & equipment must operate to the highest standards of quality. In the globalized economy, equipment & items must be sourced from all over the world to be cost effective, without any quality compromise. These challenges are present across multiple sectors: EPC contractors working on new infrastructure projects sourcing equipment & items from suppliers in remote worldwide locations – often in the developed world; energy companies investing in new-build nuclear facilities, or extending the life of existing plants.

We can help you meet this challenge by rapidly deploying experts to your site or asset. Our experts have the qualifications, deep understanding and engineering experience that is broad and also specific to various industrial sectors such as oil refineries, natural gas plants, petrochemical complexes, cross country gas pipelines, steel plants, fertilizer plants, pharmaceutical plants, mining among others.
